

Software for Students

As well as being able to install free Office 365 software via the Student Portal, Students are able to obtain other packages via;

<https://nsw-students.onthehub.com>

Windows 10, Office 2016 and 2019 for both PC and Mac is available, along with Adobe products, all free for Students. This is ideal to load onto a home PC as an example, allowing the student to use the same software that is used on the School PCs.

To obtain Licence keys and download software you will need to register (top right hand side of window) with the Students DoE email address, which is in the form of **first.last@education.nsw.gov.au**.

You will receive a confirmation email in the student's mailbox, and once confirmed you are able to "purchase" the free software at zero dollars. You will notice that you are offered an "Extended Access Guarantee" and this has a

price attached. This means that the software and licence key availability is extended from 31 days to up to 24 months.

So as long as you retrieve the key and download the software within 31 days there is no need for the Extended Access Guarantee.

You will have received the Licence key for the software in an email, and it is important to keep this in a safe place.

If you lose the License key and wish to reload the software, you may not be able to retrieve the key or get a new one (unless you have paid for the Extended Access Guarantee).
